morning show live

ON AIR WITH Behind the scenes, *Miatta Howard '26* maneuvers the camera, while *Peyton Barker '27* ensures a smooth broadcast. Their dedication and teamwork bring information and entertainment to the school every morning. The morning show isn't just a broadcast; it's a community hub, embracing a diverse array of voices from showcasing student talents to providing a platform for administrators like Mr. Fenner to share crucial updates. Mr. Fenner and other assistant principal appearances bring important school news directly to students, fostering a sense of unity and informed engagement throughout the school. The photo to the right shows a dedicated team of students working to bring the morning show to life, ensuring that each broadcast runs seamlessly. From setting up the cameras to managing the sound, their efforts are essential in creating a dynamic and informative start to the day.

girls who code makes an impact

Girls Who Code is a brand new club to this school year. Computer sciences are known to be male-dominated spaces, and so, founder and Co-Captain **Samhita Krishnamurthy '28** started this club. "I've come to realize a lot of girls are interested in learning computer science, but what is deterring them is that they don't really have the support or encouragement," says **Krishnamurthy**. Girls Who Code isn't just a platform for girls and non-binary students, it's also a community service project. The club works with a real business called Aries Farm. Aries Farm is a stable that lets people come and try horseback riding. Co-Captain **Reese Whittier '28** says she joined because she's "always been passionate about women getting more involved in fields they have a disadvantage in" and "helping someone improve their business is super cool." Girls Who Code helps Aries Farm with their technology, they are making an impact on their community.

TYPING AWAY **Alyssa Ren '28** is Co-Captain of Girls Who Code. After taking a class with **Krishnamurthy**, she found a passion for computer science. "We're actually making an impact [...] it just feels really rewarding," shares **Ren**.

MAKING A PLATFORM **Ren** reached out to **Olivia Ryu '28** to join, "if she didn't, I'm pretty sure I wouldn't be in this club." **Ryu** has found a joy for coding through this club, and more importantly an avenue to help her community and do some good.

I hope we can make an impact on the business that we're helping.
